

Modular belt conveyor

Fruit conveyors

Description

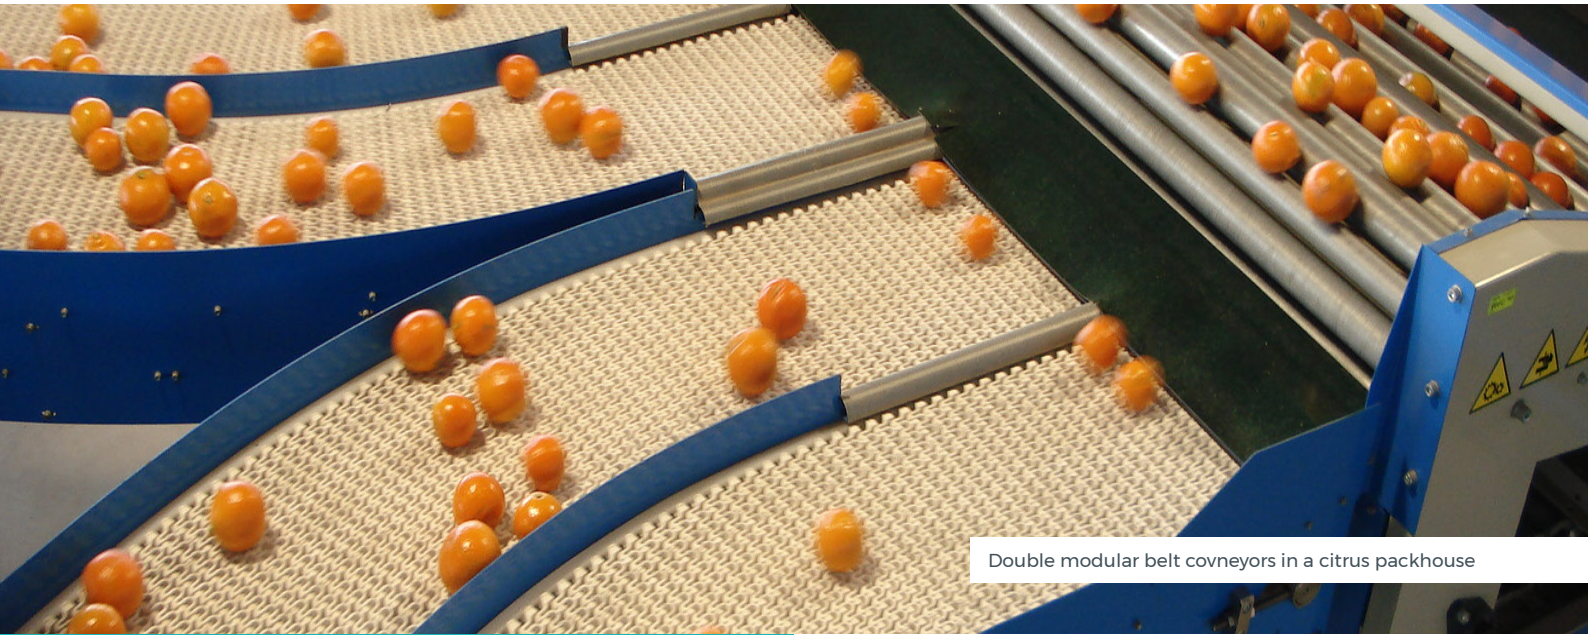

We have multitude solutions for the transport of fruit. We manufacture modular conveyors, belt conveyors or roller conveyors. Also elevators with special belts like cleated elevators or wave belts, according to the angle required and the type of fruit.

The product to be transported enters one end and exits at the opposite end. The speed of the displacement will be indicated by the product characteristics or by the work requirements.

Features

- These fruit transport systems allow the fruit movement from one point to another of the line without the intervention of any operator.
- Made of painted steel or stainless steel, according to the customer needs. Various types of belts, roller types and modular belts.
- Highest quality standards to ensure long durability.

Fruit conveyors

Double modular belt conveyors in a citrus packhouse

Key specifications

- Designed to comply with the Machine Directive of the European Union (CE) 2006/42/CE

- Maximum capacity: depending on the machine width (consult)

- Standard widths for modular belt conveyor (mm):

190 / 305 / 381 / 457 / 610

(Can be single, double or triple)

Technical information

- Power: 3 phases - 380 V - 50 Hz

- Power consumption: Consult.
